	MODEL	Picture		
1	<p>HST-410R (R-0.8s-4m)</p>		<p>High Speed Drop Arm Barrier Gate                      Arm Length 4 m                      Operation Times 0.8s (s)                      Case on the right side, and boom on the right-side                      Temperature: -35°C to 80°                      Voltage AC 230V (+/-10%), 50Hz                      Motor Power 24 VDC                      Power Consumption 150W                      Remote control distance: 30m                      Chassis thickness: 1.5mm                      Weight 30 KG</p>	
2	<p>HST-410L (L-0.8s-4m)</p>		<p>High Speed Drop Arm Barrier Gate                      Arm Length 4 m                      Operation Times 0.8s (s)                      Case on the left side, and boom on the right-side                      Temperature: -35°C to 80°                      Voltage AC 230V (+/-10%), 50Hz                      Motor Power 24 VDC                      Power Consumption 150W                      Remote control distance: 30m                      Chassis thickness: 1.5mm                      Weight 30 KG</p>	

<p>3</p>	<p><b>HST-610R</b> (R-3s-6m)</p>		<p>High Speed Drop Arm Barrier Gate          Arm Length 6 m          Operation Times 3s (s)          Case on the right side, and boom on the right-side          Temperature: -35°C to 80°          Voltage AC 230V (+/-10%), 50Hz          Motor Power 24 VDC          Power Consumption 150W          Remote control distance: 30m          Chassis thickness: 1.5mm          Weight 30 KG</p>	
<p>4</p>	<p><b>HST-610L</b> (L-3s-6m)</p>		<p>High Speed Drop Arm Barrier Gate          Arm Length 6 m          Operation Times 3s (s)          Case on the right side, and boom on the right-side          Temperature: -35°C to 80°          Voltage AC 230V (+/-10%), 50Hz          Motor Power 24 VDC          Power Consumption 150W          Remote control distance: 30m          Chassis thickness: 1.5mm          Weight 30 KG</p>
