Smart Parking

Parking

KWY3100NT
(Controller)

Features

- Good compatibility
- Image capture, contrast function
- Cardholder / Event Buffer
- Supports multiple types of cards
- Offline work function
- LED display function
- Anti-smashing car function
- Manual control function
- IP Communication
- Current Protect
- Extended functions / multiple-in and multiple-out

KEY3100NT is consist of Self-developed control and management microcontroller, memory module, clock module, card reader driver module, various brands of IC / ID card read-write module interface, optically isolated serial communication interface, TCP / IP communication interface, gate drive interface, Chinese characters Display drive interface, vehicle sensor and ground sense coil interface, power module and backup

Module/interface

- Clock module
- Card issuing module
- Card processing
- Electric brake drive interface
- Display driver interface
- Parking space display interface

Specifications

- Power: DC24V , DC12V , DC5V .
DC12V 2A :controller power supply
DC5V 2A LED :screen special power supply
DC24V 2A card :dispenser special power supply
- Programmable interface : IN1 , IN2 , IN3 , IN4
- Coil sensing : SEN1 , SEN2
- Communication:TCP/IP
- Reader: wiegand
- Relay: 6
